

## ANPING COUNTY ANYANG WIRE MESH CO.,LTD.

Stainless steel woven wire mesh mainly used for the filtration and screening of gas, liquid and solid, the separation of media and so on.

# Twill Dutch Weave

Stainless steel dutch wire mesh

woven wire mesh mainly refers to wire mesh products made with Dutch woven patterns. Our factory is an expert in woven wire mesh, especially custom and special type stainless steel dutch wire mesh. Stainless steel dutch wire mesh can be further divided into mainly four types according to weaving patterns:

Stainless steel Dutch Plain Woven wire mesh.

Stainless steel Dutch Twill Woven wire mesh.

Stainless steel Reverse Dutch Woven wire mesh.

Stainless steel Five-Heddle Woven wire mesh.

Specifications of stainless steel twill dutch wire mesh:

**Materials:** 302, 304, 304L, 310, 316, 316L, 321, 410, 410L, super duplex stainless steel, duplex stainless steel or customized.

- 304 stainless steel: Most common stainless alloy used in wire weaving. Excellent corrosion properties and can withstand temperatures of 1100 Degrees F.
- 304L stainless steel: Similar properties as 304ss but lower carbon content to permit better welding.
- 
- 316 stainless steel: Similar properties to 304ss but is stabilized by the addition of Molybdenum for increased resistance to chemical corrosion.
- 316L stainless steel: Similar properties as 316ss but lower carbon content to permit better welding.
- It can also be supplied in other metals including copper, brass and other alloy materials.

Specifications of Stainless Steel Twill Dutch Wire Mesh

Weft × Warp (inch)	Aperture Size (μm)	Available Area (%)	Thickness (mm)
20 × 270	119	17.6	0.65
20 × 200	118	12.1	0.915
24 × 300	110	19.6	0.64
20 × 150	101	7.5	1.16
30 × 340	89	17.9	0.60
30 × 270	77	11.2	0.68
40 × 540	70	23.5	0.38
40 × 430	63	15.4	0.43
50 × 600	51	17.2	0.305
50 × 500	47	12	0.364
65 × 600	36	12	0.32

## ANPING COUNTY **ANYANG** WIRE MESH CO.,LTD.

Stainless steel woven wire mesh mainly used for the filtration and screening of gas, liquid and solid, the separation of media and so on.

### **Stainless steel dutch wire mesh features:**

Solid and stable structure;

Good resistance to corrosion, abrasion, high temperature;

Resist to acid, alkali, rust;

### **Stainless steel dutch wire mesh application:**

Stainless Steel Dutch Woven Wire mesh is utilized as filter fittings for medicine, telecommunication, petroleum, chemical industry, scientific research units and so on.
